(TMI Focus, Vol. XVII, No. 4, Fall 1995)

QUARTERLY TAPE

Journey Through the T-Cells

This quarter's featured member tape is a key component of the *POSITIVE IMMUNITY PROGRAM* at-home album. Side 1 is an interview with James R. Greene—developer of the Hemi-Sync® positive immunity concept—and excerpts from related Professional Seminar presentations by John Garger, Larry Koontz, and Arthur Haggerty, PhD. A guided visualization and Hemi-Sync frequency patterns on Side 2 assist the listener into communicatibn with the immune system. Once established, this communication remains readily available for maintaining or enhancing physical well-being and as an aid for dealing with specific disorders.
